

1/2

FIG. 1

CNT = control values before !carico idrico (the values of the two groups were combined).

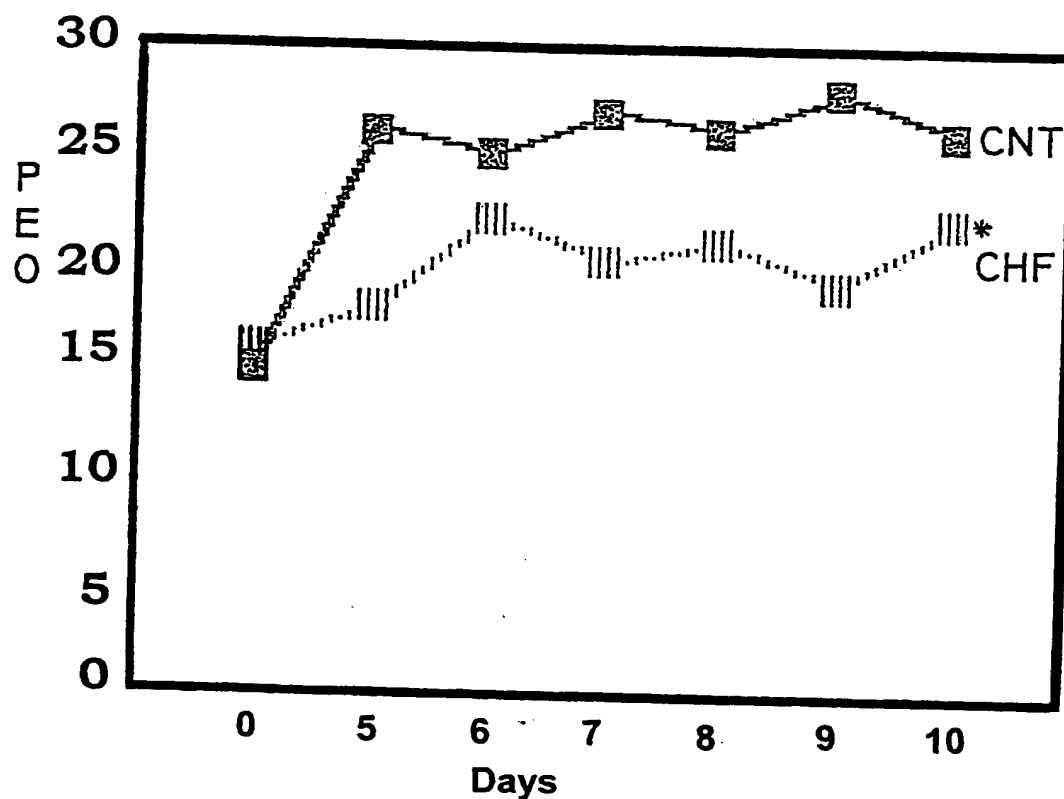

SAL = animals treated with physiological saline.

CHF = animals treated with CHF 1035.

* Significant difference compared with the SAL group, $p < 0.05$ (two-way ANOVA).

2/2

FIG. 2

CNT = control values.

CHF = animals treated with CHF 1035.

* Significant difference compared with the control group, $p < 0.05$ (two-way ANOVA).
